### Profile Summary:

Hi, I am Sibifrancis . J ,I am job seeking in JAVA Fullstack developer. Bachelor of Information Technology Student. I Consider myself a responsible and orderly person . I am looking forward for my first work Experience

### Professional Summary:

- Good Knowledge in web-based applications using JAVA/J2SE technologies and web technologies such as HTML5, JavaScript, CSS3. Extensive good knowledge in Java.
- The Core Java concepts such as OOP Concepts, Collections Framework.
- Proficient in writing complex Queries, Stored procedures, functions, packages, tables, views with major databases such as MySQL.
- Extensive development experience on different IDEs like Eclipse using java coding standards.

### Educational Qualifications:

Bachelor of Technology in Information Technology and Engineering from Erode Sengunthar Engineering College , 2024.	CGPA -8.01
AET Higher Secondary School ,Appamasamuthiram-Attur(TK)-SALEM(Dt) -	91.8%
Government Boys Higher Secondary School, Veerappanchatram-ERODE	68%

### Technical Skills:

<b>Application Frameworks</b>	Java
<b>Web Technologies</b>	HTML5, CSS3, JavaScript, Java, Tomcat Server.
<b>Database</b>	MySQL.
<b>IDE/Tools</b>	Eclipse, NetBeans, Visual Studio

### Course Completion Certificate

- B.Tech Information Technology degrees course(Full Time) during the academic years 2020-2024
- I am currently pursuing a Java Full stack Developments Course in PUMO technovation in Coimbatore

## Project Details:

**Mini Project:** Web Development .

**Duration:** Jan 2023 to March 2023

**Project Name :** Web application for Bakery

**Role:** Frond-End Developer

### Responsibilities:

- Worked in mainly web (user)interface using language such as HTML,CSS3,Java.
- On Back-End ,I utilized Java servets to built server-side logic and ensure seamless integration with a MySQL database for efficient data managements.
- **Environment:** Java,HTML,CSS3

**Mini Project :**Web Development

**Duration :**Sep 2024 to Oct 2024

**Project Name:** Website For Photostudio using Java Swing

**Role:** FullStack Developer

### Responsibilites:

- Create and manage user accounts for clients, photographers, and studio administrators.
- Implement authentication mechanisms such as login/logout and password recovery.
- Display available photography packages, services, and prices on the webpage.
- Allow administrators to add, edit, or remove services and packages as needed.

This Java Swing project would leverage the graphical user interface (GUI) capabilities of Swing for easy-to-use desktop applications . The application would likely be part of a broader system that includes a website may integrate with a backend server for handling more complex tasks like payment processing or data storage.

**Environment:**Java Swing,Mysql

**Project :**Web Development

**Duration :**Oct 2024 to Nov 2024

**Project Name:** WebPlayer

**Role:** FullStack Developer

### Responsibilites:

- The project utilizes a combination of front-end and back-end technologies to deliver a seamless, responsive, and feature-rich user experience.
- JavaScript adds interactivity to the web player. It is used to handle actions like playing/pausing audio or video, seeking within a file, controlling the volume, and updating the user interface dynamically.
- Java is used for the back-end logic and server-side operations.

The Web Player Project combines modern web technologies to deliver a robust multimedia application. By leveraging HTML, CSS, and Bootstrap for the front-end, and Java, JavaScript, and Tomcat for the back-end, this project provides an engaging and responsive web player experience for users to stream and manage their audio and video content online.
